

## **SUSTAINABLE PLUMBING** **PRACTICES COURSE (2 Day Course)**

(a prerequisite course to becoming an Accredited Enviroplumber)

### **GET AHEAD of your competitors**

This course recognises that plumbers spend six years in training developing their skills to become a professional plumber. Designed to utilise these skills and plumbers' practical technique and knowledge, this course will update you on the regulations, legislative requirements, techniques, products and work practices to effectively complete the following ;

- \* Water Conservation - Rainwater tanks, recycled water, bore water,
- \* Regulation and government incentives
- \* Energy Efficiency – Solar Hot Water Systems, Gas systems, regulation and government incentives
- \* Waste Water Management – Grey water dispersion, Grey water treatment, black water,
- \* Regulation and management
- \* Stormwater Management – Stormwater management, detention tanks regulation and management
- \* Business Practices and Marketing – OH&S, Environmental Plumbing Audit,
- \* Commercial risk and contracts.
- \* Questions and Answers

Continuing Professional Points (CPD) - Note this course earns 30 points towards the points required for the renewal a Contractors Licence over a 3 year period (CPD points required for Builders & Pool Builders Licences only at this point).

**For Further Information and Bookings please ring Nada on (02) 8789 7000**
