

Master Plumbers Association of NSW

"SERVING THE NATION FOR OVER 100 YEARS"

FREE - THE SUSTAINABLE ALTERNATIVE - RAINWATER TANKS COURSE

Over 1500 New South Wales Plumbers have undertaken this course since July 2006. Dont Miss it.

In Australia, water is a valuable commodity. Rainwater can provide a renewable supply of natural, soft, clear and odourless water that can be used for a range of purposes including washing, bathing, laundry and gardening. In some areas it may represent the primary source of household water, while in others it can supplement existing mains water supplies.

To assist the plumbing industry and the general public to understand the benefit(s) of installing a rainwater tank into residential and commercial premises, the Master Plumbers Association of New South Wales will be conducting a series of free seminars across NSW which covers the following topics:-

- * Environment and Health Regulation
 - " Requirements & responsibilities under:-
 - " NSW Code of Practice Plumbing and Drainage; AS3500; and
 - " Sydney Water Guidelines for Rainwater Tanks on Residential Properties: April 2003
- * Installation of Rainwater Tanks
- * Estimating & Costing - Practical Exercise
- * Questions and Answers

Continuing Professional Points (CPD) - Note this course earns 12 points towards the points required for the renewal a Contractors Licence over a 3 year period (CPD points required for Builders & Pool Builders Licences only at this point).
